

JOHN LIMA

IOS ENGINEER

Experience

FreeCast Inc

iOS | tvOS Engineer

Since January 2021

Contributed to the development of FreeCast's cross-platform streaming apps, delivering scalable and high-performance experiences for both iOS and tvOS users. Worked closely with product and backend teams to build and maintain complex features. Built and maintained advanced features using SwiftUI, UIKit, and MVVM, ensuring consistency and performance across both platforms. Integrated FairPlay DRM for secure media playback, handling license acquisition and streaming key .requests via backend APIs

PagBank PagSeguro

iOS Engineer

Education

Technical Degree in Systems Analysis and Development

Technical Degree focused on software engineering, algorithms, databases, and application development - FMU, Sao Paulo, Brazil

(iOS Development Program (4 months

Intensive course covering Objective-C, UIKit, and Apple development tools through hands-on projects - Impacta, Sao Paulo, Brazil

Skills

iOS	
tvOS	
Xcode	
Swift	
SwiftUI	
UIKit	

July 2018 - January 2021
Contributed to the development of PagSeguro's native iOS applications, focusing on building robust, secure, and scalable mobile solutions for one of Brazil's largest fintech companies. Developed and maintained features using Swift, applying MVVM-C architecture for better scalability and separation of concerns. Integrated RESTful web services and managed third-party dependencies using CocoaPods and Carthage. Implemented Unit Tests and UI Tests to ensure code quality and application reliability.

Stormbreaker Studios

iOS Developer

January 2020 - December 2020
Worked on a variety of iOS applications across different domains, focusing on delivering functional and user-friendly mobile experiences. Built new features and resolved bugs using Swift, following MVC architecture and clean code principles. Utilized both Storyboard/Interface Builder and programmatic UI (view code) to develop flexible, reusable components. Integrated In-App Purchases, Firebase, and third-party libraries through CocoaPods.
