

JOHN LIMA

IOS ENGINEER

EXPERIENCE

iOS | tvOS Engineer - FreeCast Inc
Since January 2021

Contributed to the development of FreeCast's cross-platform streaming apps, delivering scalable and high-performance experiences for both iOS and tvOS users. Worked closely with product and backend teams to build and maintain complex features. Built and maintained advanced features using SwiftUI, UIKit, and MVVM, ensuring consistency and performance across both platforms. Integrated FairPlay DRM for secure media playback, handling license acquisition and streaming key requests via backend APIs.

iOS Engineer - PagBank PagSeguro
July 2018 - January 2021

Contributed to the development of PagSeguro's native iOS applications, focusing on building robust, secure, and scalable mobile solutions for one of Brazil's largest fintech companies. Developed and maintained features using Swift, applying MVVM-C architecture for better scalability and separation of concerns. Integrated RESTful web services and managed third-party dependencies using CocoaPods and Carthage. Implemented Unit

PROJECTS

BaseTracking

 The easiest way to setup your analytics

LMLoading

 The best and easy way to show an loading in your view

PickImageAlert

 Photos or camera access using the system alert controller

iOS Developer - Stormbreaker Studios

January 2020 - December 2020

Worked on a variety of iOS applications across different domains, focusing on delivering functional and user-friendly mobile experiences. Built new features and resolved bugs using Swift, following MVC architecture and clean code principles. Utilized both Storyboard/Interface Builder and programmatic UI (view code) to develop flexible, reusable components. Integrated In-App Purchases, Firebase, and third-party libraries through CocoaPods.

LMStorage

 LMStorage is a framework which reduces the complexity of managing a persistent layer.

iOS Developer - BRQ

April 2017 - June 2018

Worked on the development and maintenance of native iOS applications using Swift and Objective-C, delivering features aligned with business requirements in the banking sector. Integrated RESTful web services and third-party frameworks using CocoaPods. Collaborated in an agile Scrum environment, participating in sprint planning, daily stand-ups, and retrospectives.

iOS Developer - Magna Sistemas

February 2016 - April 2017

Working with native applications using Swift, web services integration, external frameworks...

EDUCATION
